

Resuscitation Council (UK)

Certificate

This is to certify that

GDC No:

attended the

Advanced Life Support Course

on

Aims

To provide high-quality, scientific, knowledge and skills in the management of the deteriorating patient and apply current resuscitation guidelines to common events in clinical practice.

Objectives

- recognise and treat the deteriorating patient using a structured ABCDE approach;
- deliver standardised CPR in adults including manual defibrillation;
- recognise airway compromise, establishing and maintaining a patent airway and providing adequate ventilation using adjuncts
- manage a cardiac arrest by working with a multidisciplinary team in an emergency situation;
- utilise non-technical skills to facilitate strong team leadership and effective team membership.

Learning content

This course is intended to create an understanding of managing deteriorating patients and resuscitation practice to reduce potential risk factors to both patients and members of the dental team.

Development outcomes

This course meets the criteria for the GDC's development outcomes C.

CPD

15 CPD hours awarded.

This certificate is only valid when accompanied by a current Resuscitation Council (UK) course certificate.
