

## RCPCH Progress 2018 Curriculum

### Level 1 Training

Level 1 Domains	Key capabilities <sup>1</sup>	NLS provider	NLS instructor <sup>1</sup>	ARNI provider <sup>2</sup>	ARNI instructor <sup>2</sup>
3. Procedures	2. Demonstrates that they have achieved both basic and advanced life support skills.	✓			
	4. Undertakes advanced airway support, including tracheal intubation.	(✓) <sup>3</sup>			
	6. Undertakes Umbilical venous cannulation.	✓			
4. Patient Management	1. Recognises the life-threatening nature of some acute situations in CYP and knows when to call for help or seek personal support.	✓			
	2. Carries out an assessment, makes a differential diagnosis, plans appropriate investigations and initiates a treatment plan in accordance with national and local policies.	(✓)			
6. Leadership and teamworking	1. Supports decisions made within a team and communicates these effectively.	✓			
8. Quality improvement	1. Demonstrates the ability to follow the local and national clinical guidelines and protocols.	✓			

<sup>1</sup> It is not possible for a level 1 trainee to become an NLS instructor.

<sup>2</sup> The ARNI course is suitable for level 2 and 3 trainees.

<sup>3</sup> NLS teaches advanced airway manoeuvres without a focus on endotracheal intubation. All candidates have to demonstrate such manoeuvres in the airway test, therefore demonstrating their acquisition of these skills.
